# E

| Block Group: | Constants |
|---|---|
| Icon: | e |

The E block is a Number block. When the E block is created, the E block holds the mathematical constant *e*.

For information on using dataflow blocks, see Dataflow.

---

## Input/Output Property

The following property of the E block can take input and give output.

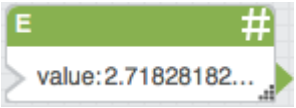
- value *(number)*

**value** sets and returns the number held by this E block. When an E block is created, the value property holds the mathematical constant *e*.

---

## Example

The following image demonstrates an example of the E block.



---

Previous: Pi

Next: SQRT2
