

# Keyboard Shortcuts

A keyboard shortcut is a set of one or more keys that invoke a DGLux5 operation when pressed by the user. You can use these to expedite common operations.

---

## Main Menu

These lists provide shortcuts to items in the Main Menu.

### File Menu

This list provides shortcuts to items in the **File** menu.

Result	Windows	Mac OS
<a href="#">New File</a>	Shift + N	Shift + N

---

## Tools Panel

This list provides shortcuts for the [Tools panel](#). These shortcuts do not work when you are editing text.

Pressing a key has the same effect as clicking a tool once. To select a drawing tool in [multiple drawing mode](#), use the keyboard shortcut twice.

Result	Windows	Mac OS
Selection tool	S	S
Path selection tool	Ctrl + Shift + P	Cmd + Shift + P or Ctrl + Shift + P
Transform tool	T	T
Rectangle tool	R	R
Ellipse tool	E	E
Path tool	Ctrl + P	Ctrl + P
Line tool	L	L
Polyline tool	W	W

---

## Quick Access Panel

This list provides shortcuts to commands in the [Quick Access panel](#).

Result	Windows	Mac OS
Group elements	Ctrl + G	Cmd + G or Ctrl + G
Ungroup elements	Ctrl + U	Cmd + U or Ctrl + U
Full size	Ctrl + 9	Ctrl + 9 or Cmd + 9
<a href="#">Undo</a>	Ctrl + Z	Cmd + Z or Ctrl + Z
<a href="#">Redo</a>	Ctrl + Y	Cmd + Y or Ctrl + Y

---

## Selection

This list provides shortcuts to selection commands.

Result	Windows	Mac OS
Select all	Ctrl + A	Cmd + A or Ctrl + A
Clear current selection	Ctrl + Alt + A	Ctrl + Opt + A
Add items to the current selection, or remove items from the current selection	With the  <b>Selection</b> tool, Ctrl + click items	With the  <b>Selection</b> tool, Shift + click items

## Panel Management

These shortcuts relate to [managing panels](#) in the workspace.

- Press Ctrl + L to open an element's [dataflow](#).
- Hold H to make [undocked panels](#), windows, and pop-ups translucent.

## Application Mode

This shortcut relates to the current [Application mode](#).

- Hold P to temporarily change to Preview mode. Release P to return to Edit mode.
