

Export Paginated PDF

Block Group:	Browser API
Icon:	None

Exports the contents of the containing view deck or group as a paginated PDF file.

Input/Output Properties

These properties can take input and give output.

- *invoke (trigger)*
- *enabled (boolean)*
- *filename (string)*
- *padding (string)*
- *orientation (string)*
- *units (string)*
- *size (string)*
- *scale (string)*

invoke exports the file, if **enabled** is set to TRUE.

enabled specifies whether exporting to PDF is enabled.

filename specifies a name for the exported file. If blank, the file is returned as data in **output** and is not downloaded.

padding specifies the size of the page margin.

orientation specifies the desired page layout.

units specifies the units for padding (inches or millimeters).

size specifies the page size.

scale specifies the resolution factor. To sharpen the rendering of content that might be fuzzy if untreated, increase this setting.

Output Properties

These properties can give output. They cannot take input.

- output (*string*)

output returns the contents of the exported file, if no filename is specified.
