

E

Block Group:	Constants
Icon:	

The E block is a [Number](#) block. When the E block is created, the E block holds the mathematical constant e .

For information on using dataflow blocks, see [Dataflow](#).

Input/Output Property

The following property of the E block can take input and give output.

- value (*number*)

value sets and returns the number held by this E block. When an E block is created, the value property holds the mathematical constant e .

Example

The following image demonstrates an example of the E block.

[Previous: Pi](#)

[Next: SQRT2](#)
