

LN10

Block Group:	Constants
Icon:	

The LN10 block is a [Number](#) block. When the LN10 block is created, the LN10 block holds the mathematical constant for the natural logarithm of ten.

For information on using dataflow blocks, see [Dataflow](#).

Input/Output Property

The following property of the LN10 block can take input and give output.

- value (*number*)

value sets and returns the number held by this LN10 block. When the LN10 block is created, the **value** property holds the mathematical constant for the natural logarithm of ten.

Example

The following image demonstrates an example of the LN10 block.

[Previous: LN2](#)
