LOG10E

Block Group:	Constants
Icon:	.434

The LOG10E block is a Number block. When the LOG10E block is created, the LOG10E block holds the mathematical constant for the base-10 logarithm of the constant *e*.

For information on using dataflow blocks, see Dataflow.

Input/Output Property

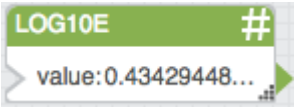

The following property of the LOG10E block can take input and give output.

- value *(number)*

value sets and returns the number held by this LOG10E block. When a LOG10E block is created, the **value** property holds the mathematical constant for the base-10 logarithm of the constant *e*.

Example

The following image demonstrates an example of the LOG10E block.

Previous: LOG2E

Next: NAN
