

# LOG10E

Block Group:	<a href="#">Constants</a>
Icon:	

The LOG10E block is a [Number](#) block. When the LOG10E block is created, the LOG10E block holds the mathematical constant for the base-10 logarithm of the constant  $e$ .

For information on using dataflow blocks, see [Dataflow](#).

---

## Input/Output Property

The following property of the LOG10E block can take input and give output.

- *value (number)*

**value** sets and returns the number held by this LOG10E block. When a LOG10E block is created, the **value** property holds the mathematical constant for the base-10 logarithm of the constant  $e$ .

---

## Example

The following image demonstrates an example of the LOG10E block.
