

Pi

Block Group:	Constants
Icon:	π

The Pi block is a [Number](#) block. When the Pi block is created, the Pi block holds the mathematical constant pi.

For information on using dataflow blocks, see [Dataflow](#).

Input/Output Property

The following property of the Pi block can take input and give output.

- value (*number*)

value sets and returns the number held by this Pi block. When a Pi block is created, the **value** property holds the mathematical constant pi.

Example

The following image demonstrates an example of the Pi block.
