

# SQRT2

Block Group:	Constants
Icon:	$\sqrt{2}$

The SQRT2 is a [Number](#) block. When the SQRT2 block is created, the SQRT2 block holds the mathematical constant for the square root of two.

For information on using dataflow blocks, see [Dataflow](#).

---

## Input/Output Property

The following property of the SQRT2 block can take input and give output.

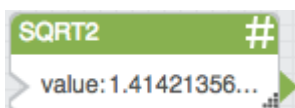

- value (*number*)

**value** sets and returns the number held by this SQRT2 block. When a SQRT2 block is created, the **value** property holds the mathematical constant for the square root of two.

---

## Example

The following image demonstrates an example of the SQRT2 block.
