Date Time Operations

These Date Time Operations blocks perform formatting and other operations on dates, times, and ranges.

Block	Icon	Description
Date Time		Takes multiple inputs that represent a year, month, day, hour, minute, second, and millisecond and returns the sequential serial number that represents the date and time
Date Format		Reformats a date and time string or converts a serial number to a date and time string
Parse Date Time		Converts a serial number or a date and time string to multiple outputs that represent the serial number, year, month, day, hour, minute, second, millisecond, and weekday
Date Math		Adds time to or subtracts time from the input date and time
Date Range		Returns a formatted date and time range based on the defined formatting options
