

Average

Block Group:	Statistical Functions
Icon:	

The Average block returns the mean of its arguments.

For information on using dataflow blocks, see [Dataflow](#).

For accepted and excluded arguments of Statistical Functions blocks, see [Statistical Functions](#).

Input/Output Property

The following property of the Average block can take input and give output.

- input n (*number*)

input n specifies one of the values to include in the calculation.

Output Property

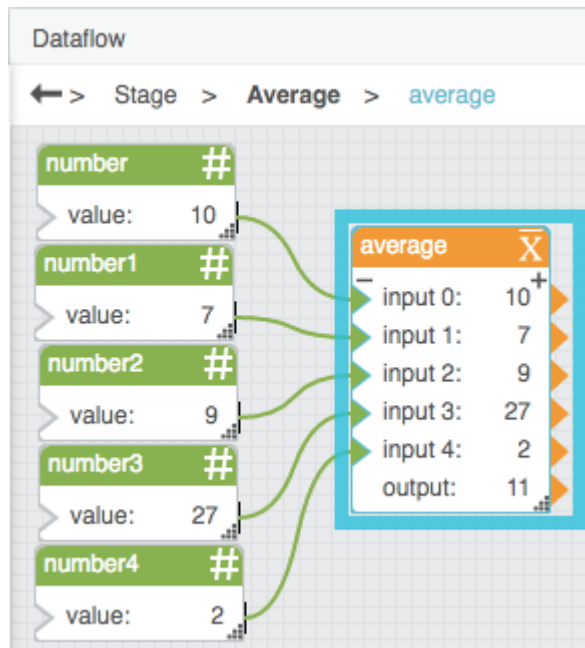

The following property of the Average block can give output but cannot take input.

- output (*number*)

output returns the mean of all **input n** values.

Example

The following image shows an example of the Average block.
