Concatenate

Block Group:	String Operations
Icon:	A+E

The Concatenate block joins multiple text strings into one string.

For information on using dataflow blocks, see Dataflow.

Input/Output Properties

The following properties of the Concatenate block can take input and give output.

- input *n (string)*
- strict *(boolean)*

input *n* specifies one of the strings to concatenate.

Output Property

The following property of the Concatenate block can give output but cannot take input.

- output *(string)*

output returns a string formed by concatenating all of the input values.

Example

The following image demonstrates a Concatenate block. In this example, three strings are concatenated.
