

# Sine

Block Group:	Trigonometric Functions
Icon:	

The Sine block returns the sine of the given angle.

For information on using dataflow blocks, see [Dataflow](#).

---

## Input/Output Property

The following property of the Sine block can take input and give output.

- **input (number)**

**input** specifies the angle to get the sine for, in degrees.

---

## Output Property

The following property of the Sine block can give output but cannot take input.

- **output (number)**

**output** returns the sine of the input.

---

## Example

The following image shows an example of the Sine block. In this example, the angle is 90 degrees, and the sine is one.

Previous: Radian

Next: Tangent
