

Color

Block Group:	Variables
Icon:	

Holds values that describe a solid, gradient, or image fill that can be set with a DGLux5 [fill pop-up](#).

You can use the fill pop-up from within the dataflow workflow to specify a color value.

For information on using dataflow blocks, see [Dataflow](#).

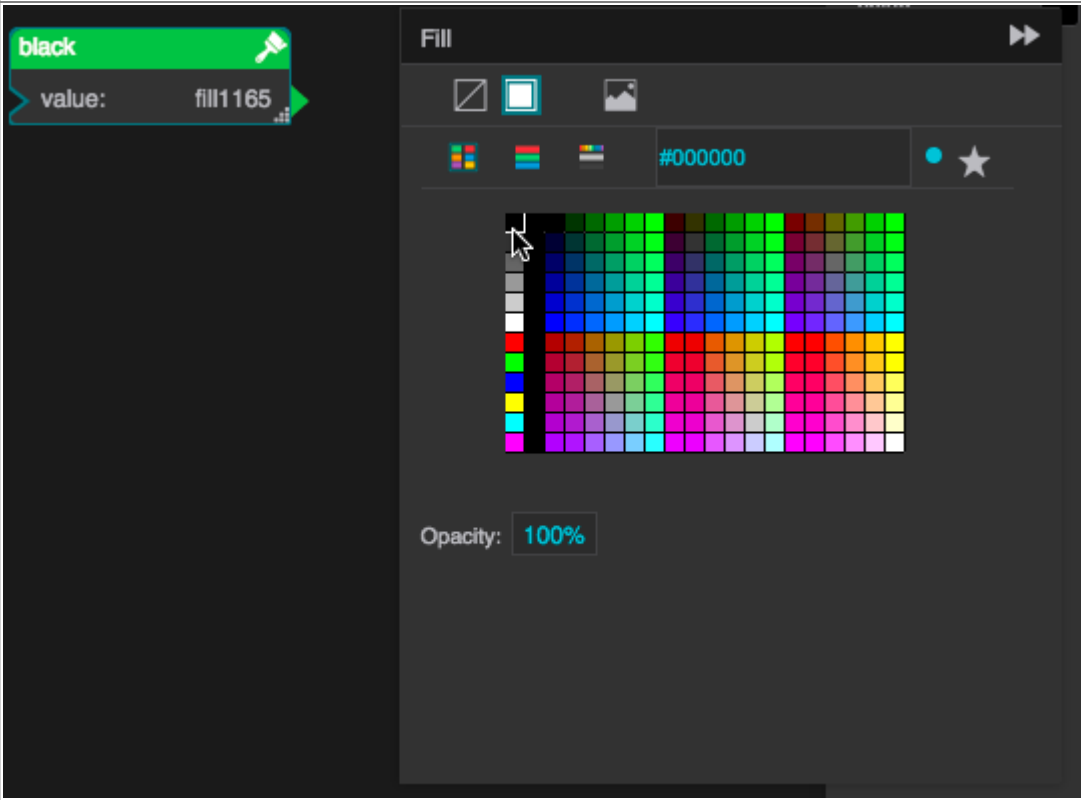

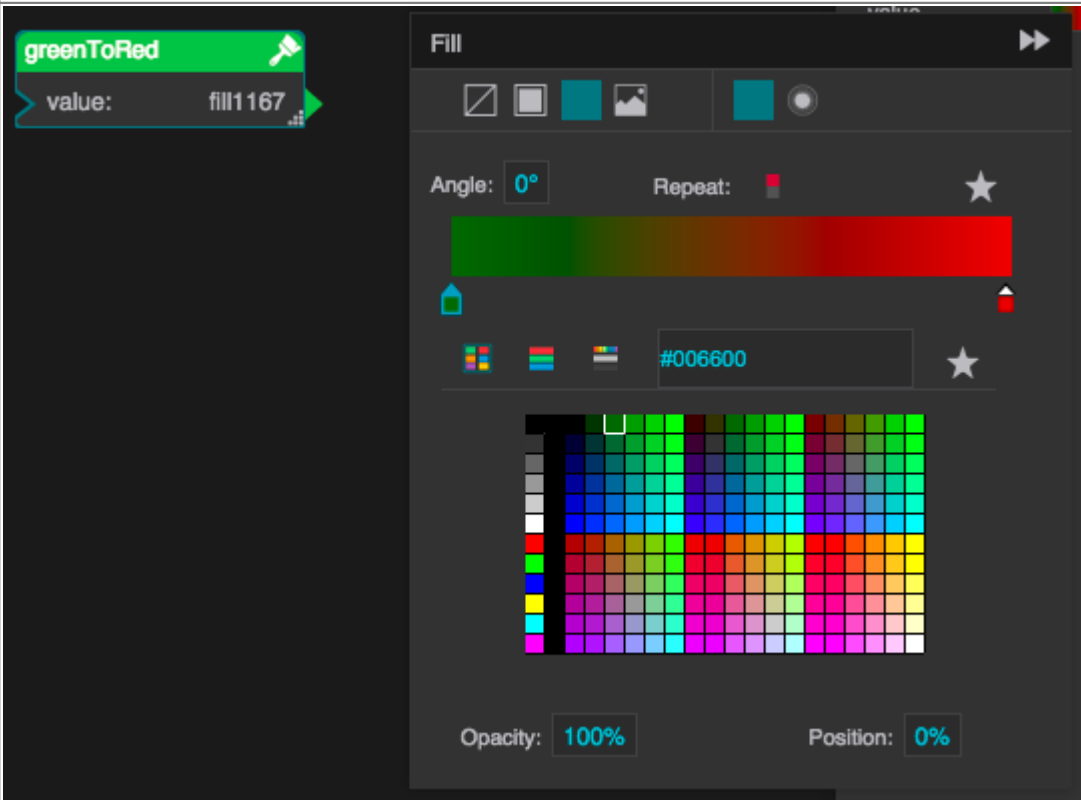

Input/Output Properties

This property can take input and give output.

- value (*DGLux5 Fill property*)
-

Model

These are basic uses of the block.

Dataflow model	Description (Result)
	<p>Solid color fill (black)</p>
	<p>Gradient fill (green to red gradient)</p>
