Number

Block Group:	Variables
Icon:	#

The number block holds a value that describes a measurable quantity as a number.

For information on using dataflow blocks, see Dataflow.

Input/Output Property

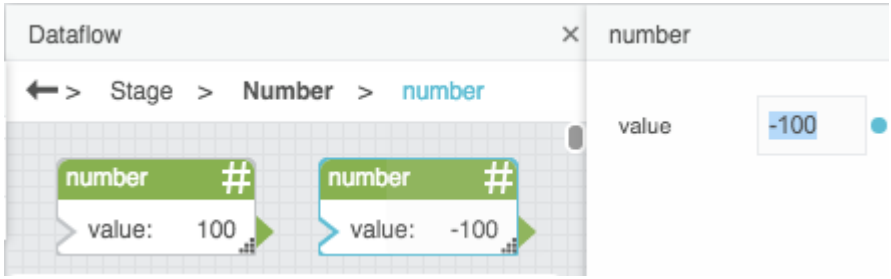

This property of the Number block can take input and give output.

- value *(number)*

value sets and returns the value held by this Number block.

Examples

The following image demonstrates two Number blocks. The leftmost block holds the number one hundred (100). The rightmost block holds the number negative one hundred (−100).

Previous: String

Next: Boolean
