String

Block Group:	Variables
Icon:	str

The String block holds a value as a sequence of characters.

The String block's value can include line breaks. Type Alt + Enter to create a line break.

For information on using dataflow blocks, see Dataflow.

Input/Output Property

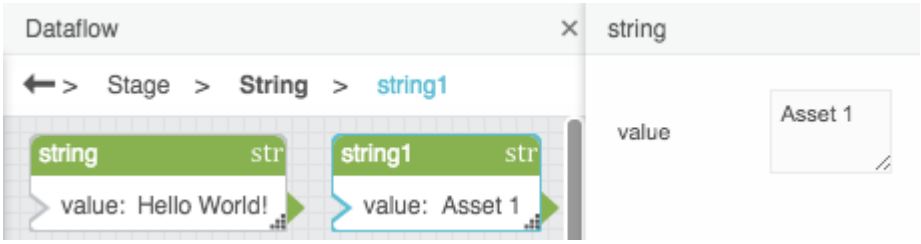

The following property of the String block can take input and give output.

- value *(string)*

value sets and returns the value held by this String block.

Examples

The following image demonstrates two String blocks. The leftmost block holds the string “Hello World!” The rightmost block holds the string “Asset 1”.

Previous: Variables

Next: Number
