

# Deploy a Project

You can follow the steps in [this video](#) to add your users to the project, and give them read-only or write access.

To share your project with anyone who has the link:

1. Select **Project > Project Properties**.
2. For **Who has access**, choose **Anyone who has the link can view**.
3. Make sure you have [saved your changes](#).
4. Open the `index.dg5` file for your project.
5. Right-click **Preview** and select **Copy Viewer Link**.
6. Share the URL of the deployed project with your users.
