

Preview a Project

You can preview your project within your workspace, or view it in its own browser tab.

Preview within the Workspace

You can change the application mode from [Edit mode](#) to [Preview mode](#). Edit mode lets you select components in the [Document window](#) for editing. Preview mode enables user interactions with the page, such as clicking.

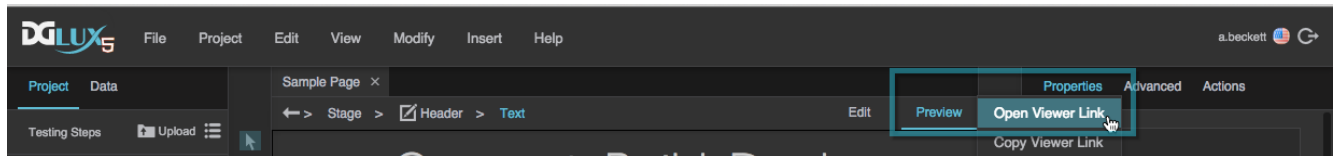

- At the top of the Document window, click **Preview**.

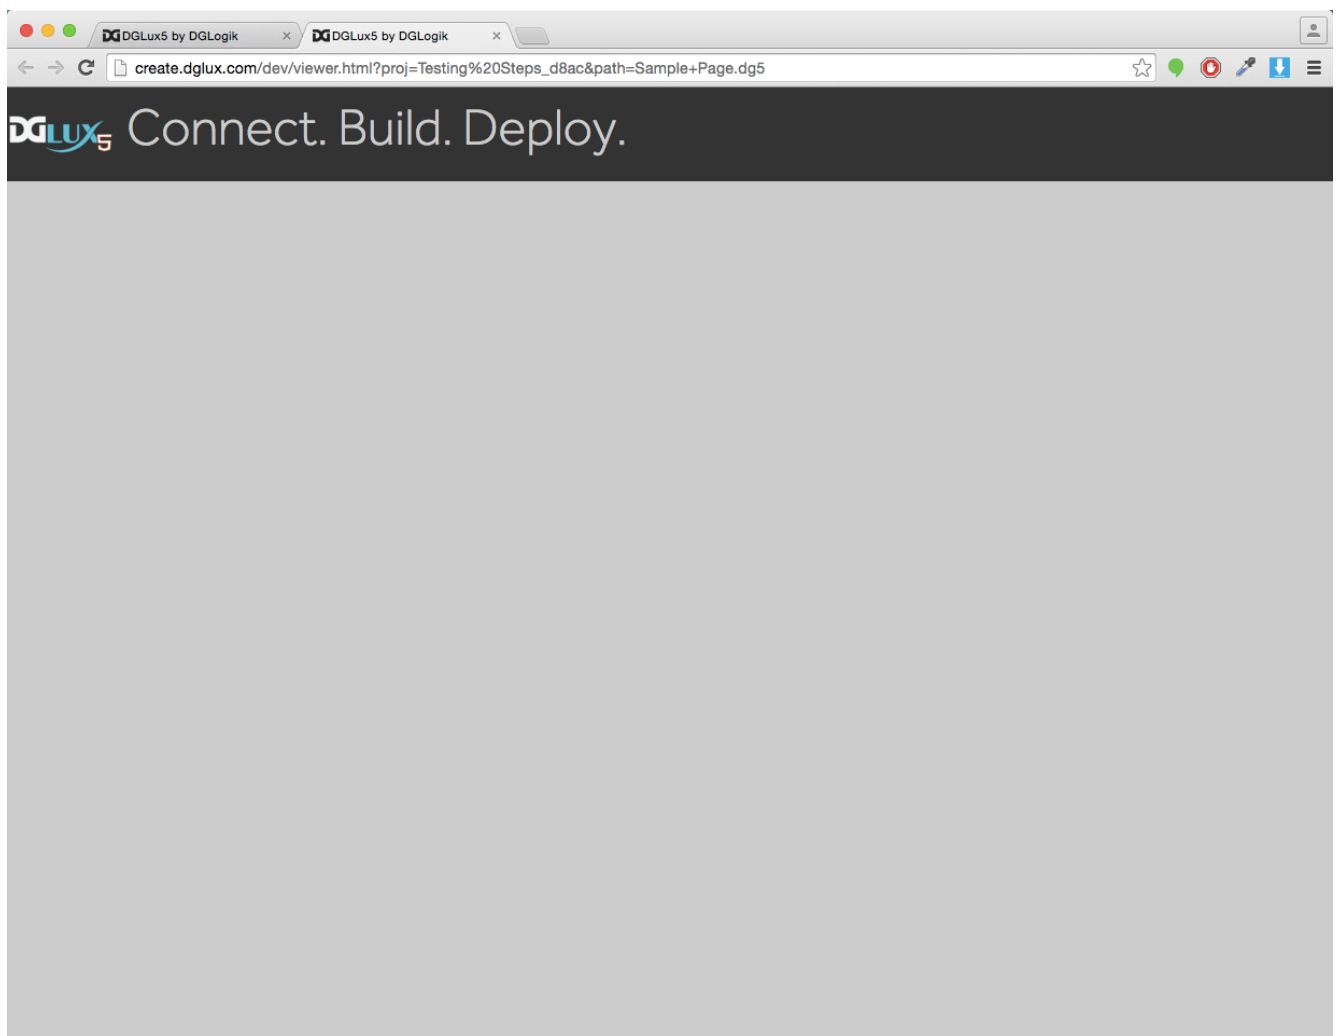

View the Project

Alternatively, you can view the project in a new browser tab or window.

- At the top of the [Document window](#), right-click **Preview**, and select **Open Viewer Link**.

The project opens in a new browser tab or window and behaves as at runtime.
