Update DGLux5

This page covers how to update DGLux5.

To check your DGLux5 revision, choose **Help** > **About**.

Update to a Major Revision

If you want to update to the latest major revision of DGLux5, do one of the following:

- Reinstall for Niagara AX as described here.
- Reinstall for Niagara 4 as described here.
- In DSA, under **sys**, invoke **Update All Components**.

Update to a Particular Build

Follow the steps in this video to update the DGLux5 build.

Download the latest stable build here.

Previous: Install DGLux5 Server

Next: Uninstall DGLux
