

Requirements and Installation

Read this page to start using Project Assist.

Requirements

Before using Project Assist, make sure you have the following:

- Required: DGLux5.
- Required if you are using Niagara: Niagara AX or Niagara 4. Recommended: version 3.7 or later.
- Recommended if you are using a JACE controller: JACE-700 or above.
- Sufficient space. Project Assist requires 35 MB including HVAC assets and styles. Without HVAC assets, it requires 3 MB. Without assets or styles, it requires 750 kB.

If you need to install DGLux5, see [Install DGLux5 for Niagara AX](#) or [Install DGLux5 for Niagara 4](#).

Installation

Project Assist is a DGLux5 project template that you can download and import:

1. [Download](#) the Project Assist DGLux5 project template from the DGLogik website.
 2. Ensure the device has sufficient space.
 3. In your web browser, log in to DGLux5.
 4. Select **Project > Export/Import > Import Project**.
 5. Click **Choose File**, and select pa2_main_rXXX.zip.
 6. Click **OK**.
