

Pages and Pop-Ups

In Project Assist 2.0, you can use the Node Editor dialog to specify whether a location or device has a regular page or a pop-up. Pop-ups open in floating or tabbed panels in front of the currently open page. Pop-ups can be viewed only in the Preview or Launched modes.

To change page and pop-up settings:

1. Click **Organize** or **Manage Navigation**.

2. In the Project Tree, right-click a node and select **Edit**.

3. Set **As Popup** to TRUE or FALSE.

A regular page
