

Chart

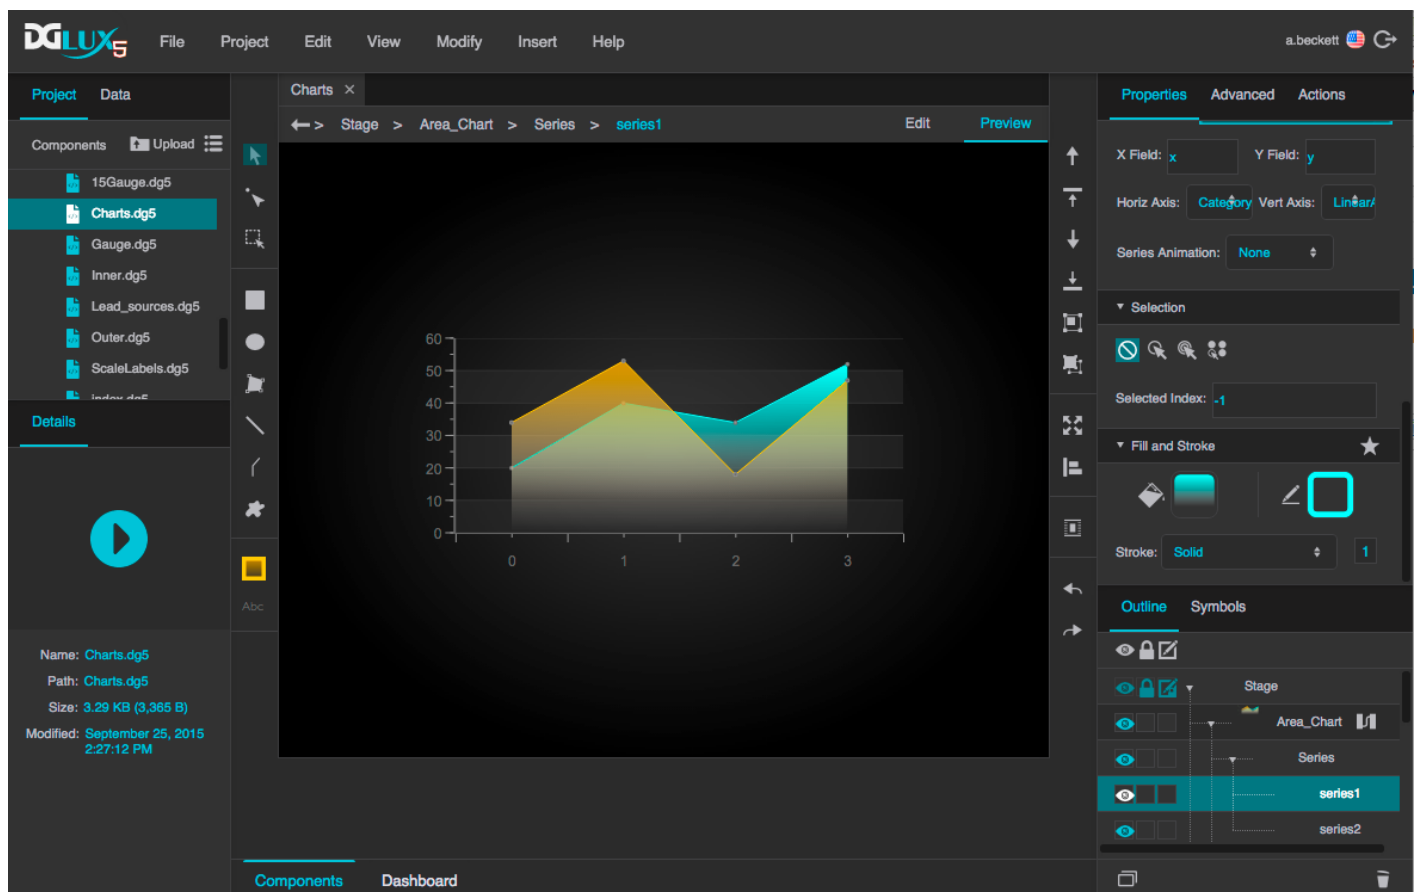

This is the universal, empty chart widget. You can use it to display these types of series:

- Line
- Area
- Column
- Bar
- Bubble
- Pie
- Spread spectrum
- Radar

To use this widget, you first insert the empty widget by selecting **Insert > Charts > Chart**. Then, you add data, series, and axes. Finally, you customize the chart's style and behavior using [properties](#).

For steps to use and configure this widget, see [Designing Charts](#).

For a detailed reference of properties that affect charts, see [Common Properties](#) and [Chart Properties](#).
