

# Common Properties

These property groups apply to many component and shape types.

- [General](#) properties appear at the top of the Property Inspector.
- [Scrolling](#) properties affect the scrolling behavior of the element
- [Selection](#) properties control selection behavior. They are available for the Stage, and for groups, view decks, maps, data grids, trees, and chart series.
- [Fill and Stroke](#) properties affect the background and border of the element.
- [Rounded Corners](#) properties define rounded corners for the element, using a pixel value or a percent.
- [Effects](#) properties control opacity, shadows, and filter effects.
- [Position and Size](#) properties affect the position and size of the element.
- [Transform](#) properties control the rotation of the object.
- [Callout](#) properties control the content, position, and behavior of the element's [callout](#).
