

Scrolling Properties

These properties affect the scrolling behavior of the element.

The Scrolling properties in the Property Inspector

Scrolling properties affect the appearance of the scrollbar's thumb and track. The thumb is the part of the scrollbar that the user can move, and the track is the area in which the thumb moves.

Month	Referral	Event	Internet	Phone
2015-01	15	0	120	27
2015-02	170	180	320	190
2015-03	150	200	350	90
2015-04	220	330	70	90
2015-05	165	30	300	340

1. Thumb
2. Track

Important

Thumb and track properties are supported only in Chrome. In other browsers, the appearance of the thumb and track are specified by the browser. This is true of both [Edit mode](#) and the [Viewer](#).

Click to display/hide all elements

Horizontal Scrolling

Defines horizontal scrolling behavior on this element

Off

Horizontal scrolling is always disabled.

On

Horizontal scrolling is always enabled. The track appears even if the content does not overflow.

Auto

Horizontal scrolling is automatically enabled when content overflows.

The Horizontal Scrolling property

Vertical Scrolling

Defines vertical scrolling behavior on this element

Off

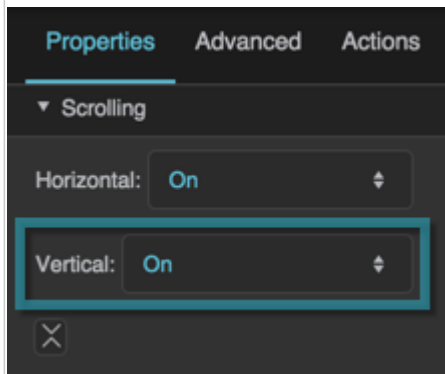

Vertical scrolling is always disabled.

On

Vertical scrolling is always enabled. The track appears even if the content does not overflow.

Auto

Vertical scrolling is automatically enabled when content overflows.

The Vertical Scrolling property

Vertical Scrollbar Width

Defines the width of the vertical scrollbar on this container, as a pixel value or a percentage of the container width.

The Vertical Scrollbar Width property

Horizontal Scrollbar Height

Defines the height of the horizontal scrollbar on this container, as a pixel value or a percentage of the container height.

The Horizontal Scrollbar Height property

Thumb Fill

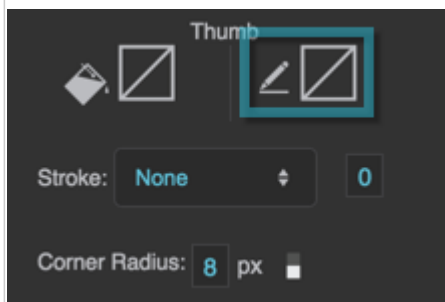

Defines the fill of the thumbs in this container's scrollbars.

The Thumb Fill property

Thumb Stroke Color

Defines the stroke color for outlining the thumbs in this container's scrollbars.

The Thumb Stroke Color property

Thumb Stroke Style

Defines the stroke style for outlining the thumbs in this container's scrollbars.

The Thumb Stroke Style property

Thumb Stroke Weight

Defines the stroke weight for outlining the thumbs in this container's scrollbars.

The Thumb Stroke Weight property

Thumb Corner Radius

Defines rounded corners for the thumbs in this container's scrollbars, as arcs of circles or ellipses. The circles or ellipses are defined using a pixel value or percentage. A pixel value define the radius of a circle. A percentage value defines an ellipse with horizontal and vertical radii that are that percentage of the component's width and height, respectively.

The Thumb Corner Radius property

Track Fill

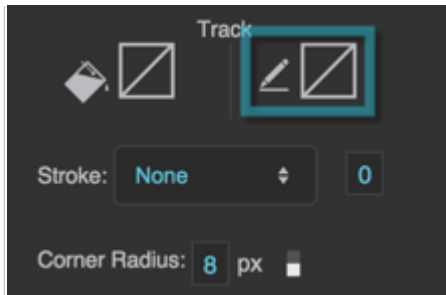

Defines the fill of the track in this container's scrollbars.

The Track Fill property

Track Stroke Color

Defines the stroke color for outlining the track in this container's scrollbars.

The Track Stroke Color property

Track Stroke Style

Defines the stroke style for outlining the track in this container's scrollbars.

The Track Stroke Style property

Track Stroke Weight

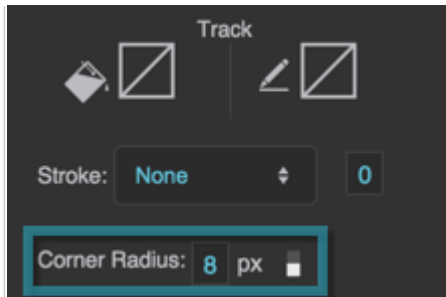

Defines the stroke weight for outlining the track in this container's scrollbars.

The Track Stroke Weight property

Track Corner Radius

Defines rounded corners for the tracks in this container's scrollbars, as arcs of circles or ellipses. The circles or ellipses are defined using a pixel value or percentage. A pixel value defines the radius of a circle. A percentage value defines an ellipse with horizontal and vertical radii that are that percentage of the component's width and height, respectively.

The Track Corner Radius property
