

Actions Panel

The Actions panel allows you to create behaviors for your application that respond to user interaction. These behaviors are also known as [Actions](#). By default, the Actions panel is located at the top right corner of the DGLux workspace, in a tab behind the [Property Inspector](#).

The location of the Actions panel

The Actions panel displays actions for the element that is currently selected in the [Document window](#) and [Outline](#).

For information about configuring and using actions, see [Actions](#).

[Previous: Advanced Properties Panel](#)
