

Details Panel

The Details panel contains a preview and other information for the currently selected file in the [Project panel](#). By default, it is located at the bottom left corner of the DGLux5 workspace.

The location of the Details panel

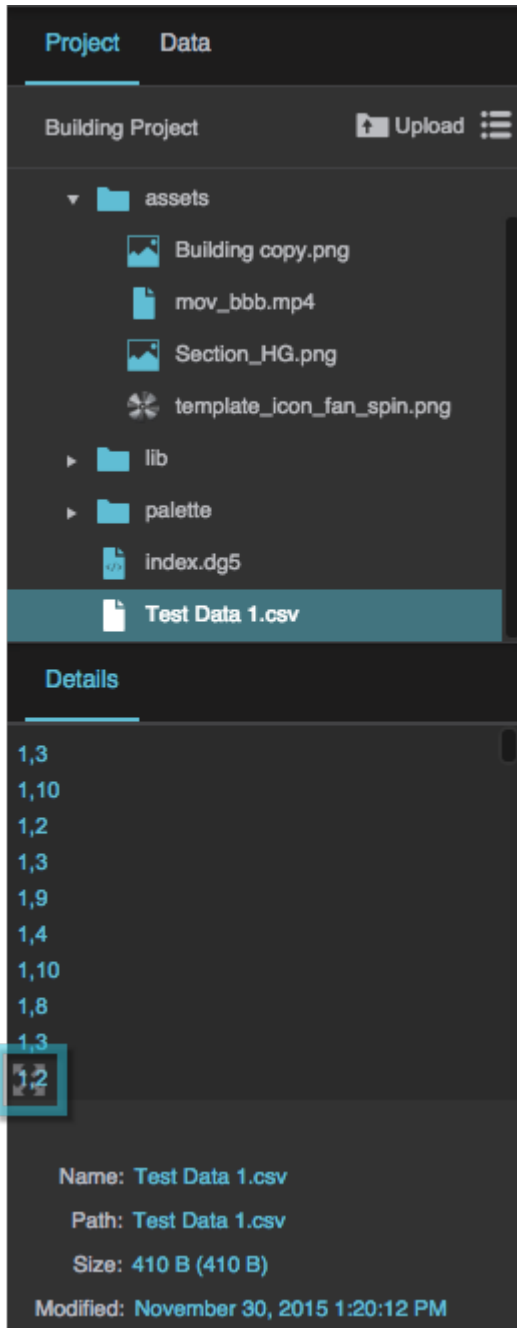

The Details panel is visible only when the [Project panel](#), as opposed to the [Data panel](#), is selected. If the Data panel is selected, the [Metrics panel](#) appears instead of the Details panel.

Edit a File

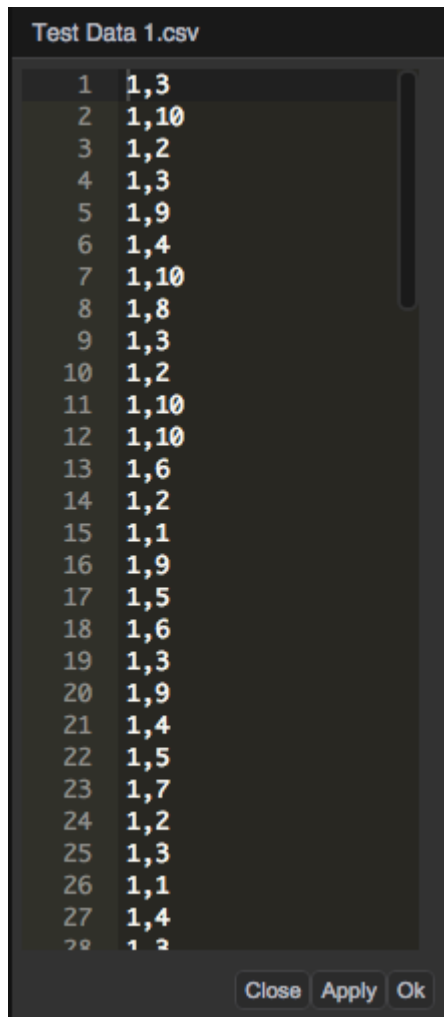

If the selected file is a code or text file, you can edit it within DGLux5 using the Details panel.

1. Select the file.

2. In the Details panel, click  **Edit in Window**.

3. Edit the file in the pop-up.

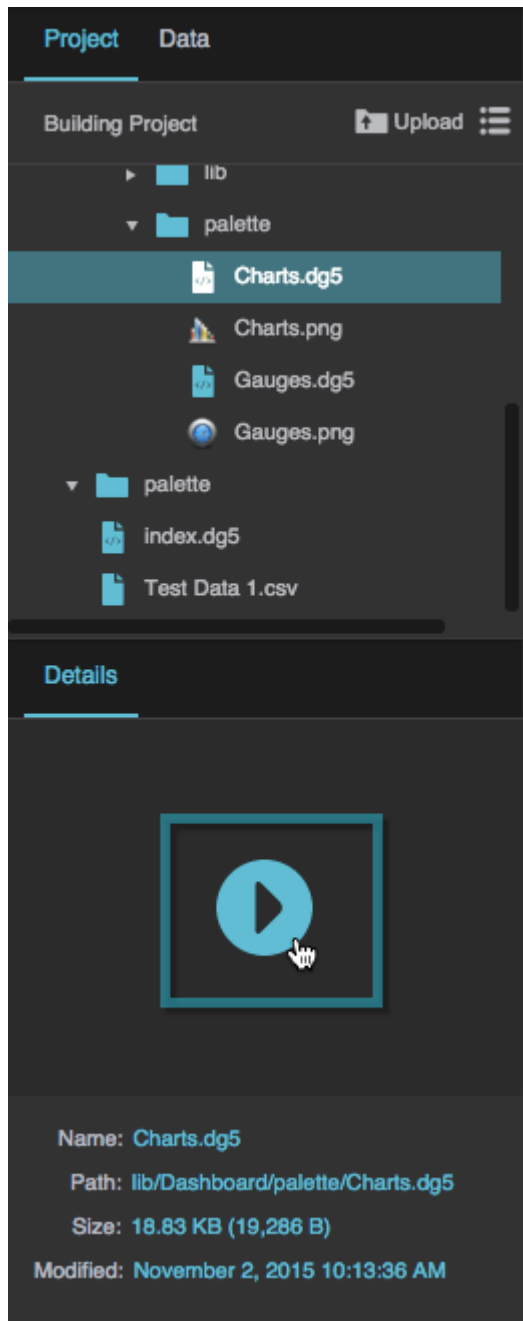

4. Click **Apply** to apply changes to the file, or **OK** to apply changes and also close the pop-up.

Preview a DG5 File

If the selected file is a .dg5 file, you can preview it within the Details panel.

1. Select the .dg5 file.
2. In the Details panel, click the Play button.

3. A preview of the page appears.
