Open a Project

DGLux5 can open or import projects that were created with DGLux5.

When you open a project, the project files are displayed in the Project panel. Pages that you save are saved to the open project.

Method 1: Open a Project

To open a project:

1. In the Main Menu, select **Project** > **Open Project**.
2. In the Welcome dialog, make sure **Open/Import** is selected.
3. Choose a project, and click **Open**.

Method 2: Open a Recent Project

To open a recent project:

1. In the Main Menu, select **Project** > **Recent**.

   The recent projects for your user account are listed.

2. Choose the project.

Previous: Create a New Template

Next: Import a Project
