Themes

You can use DGLux5 themes to change the appearance of your DGLux5 workspace. To change themes, select **Modify** > **Change Theme**, and specify a theme in the pop-up.

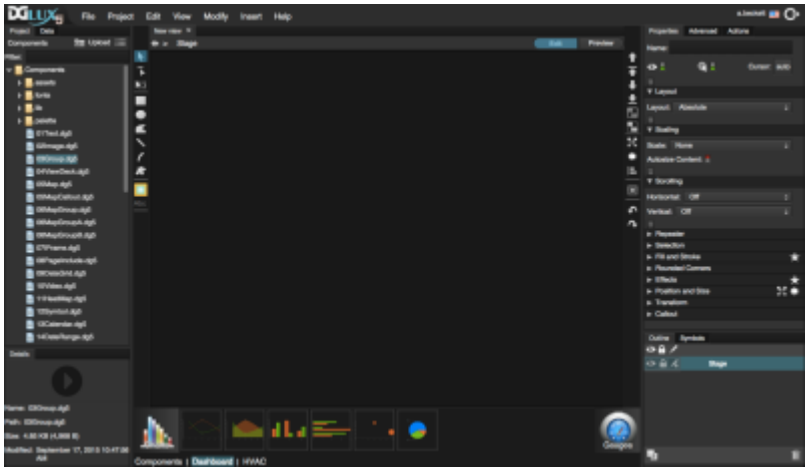

Note

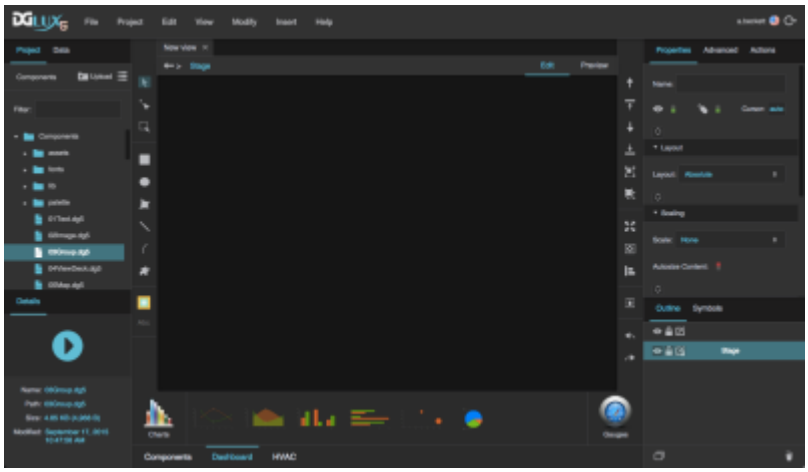

If you clear your cookies, your theme will revert to the default theme, and you must set it again.

Themes available in DGLux5 are:

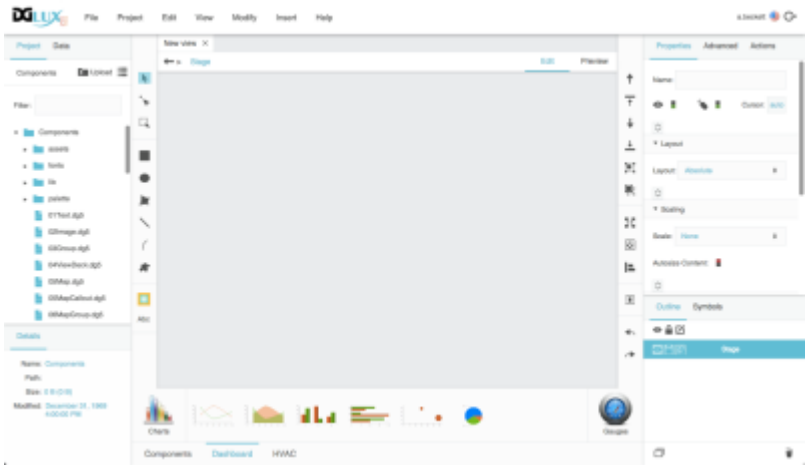

- The default theme:

- The DGLux5 Dark theme:

- The DGLux5 Light theme:

Click on an image to enlarge it in the browser window.
