

Version 1415 (March 2019)

Learn what's new in the latest release of DG Solution Builder.

ESRI Map Integration

Adding another map component to extend your development requirements.

Leverage an additional map component into your software application. With over a dozen map types, a 3D view feature and incorporating map group, geoJSON or heatmap layers, ESRI map component simply extends your development requirements for your future projects. Check out this video to see an example of how ESRI map can be utilized. (hyperlink to Noah's video)

User & Profile Management

Simplifying the ability for administrators to manage users and user passwords.
