

Version 1415 (March 2019)

Learn what's new in the latest release of DG Solution Builder.

ESRI Map Integration

Leverage an additional map component into your software application. With over a dozen map types, a 3D view feature and incorporating map group, geoJSON or heatmap layers, ESRI map component simply extends your development requirements for your future projects.

To implement an ESRI map in your project, simply:

1. Right click on your project stage
2. Select Insert
3. Select Component
4. Scroll to and select ESRI Map Group

Learn more about how you can [leverage ESRI Maps](#) in your project.

User & Profile Management

Simplifying the ability for administrators to manage users and user passwords.
